## Another Anodyne Acquisition

10/2/2006

Anodyne Medical Device Inc., a Los Angeles based company formed in February to roll up medical support surface firms, has announced another strategic acquisition.

The company said it has bought Corona-based Anatomic Concepts Inc. which designs, manufactures and distributes mattresses, mattress overlays, operating room table pads and related accessories. The purchase price was not disclosed.

Medical support surfaces are used in the prevention and treatment of pressure wounds experienced by patients with limited mobility. Chief Executive Mark Bidner said Anatomic's

operating room positioning devices fill an important hole in Anodyne's product line.

Anodyne's first acquisitions were of two other leading companies in the sector: AMF Support Surfaces Inc. in Corona and SenTech Medical Systems Inc. in Coral Springs, Fla. The company is backed by two private investment firms, Compass Group International LLC and Hollywood Capital Inc., both of which target companies in the \$5 million to \$30 million revenue range.

### **Anodyne Medical Device Acquires Anatomic Concepts**

Anodyne Medical Device Inc, Los Angeles, has executed definitive purchase agreements for the acquisition of Anatomic Concepts Inc, Corona, Calif, from Anatomic Global Inc. The transaction closed at the end of September.

Anatomic Concepts designs, manufactures, and distributes medical support surfaces and medical patient-positioning devices, including mattresses, mattress overlays, mattress replacements, operating room patient-positioning devices, operating room table pads, and related accessories.

Anatomic Concepts delivers the benefits of innovative technology to sleeping, seating, and patient-positioning surfaces worldwide. Protected by eight US and 26 international patents, Anatomic Sleep Support Surface Technology products provide enhanced spinal support for effectiveness in skin integrity protection and patient comfort.

"We are excited about the opportunity to utilize Anatomic Concepts' proprietary patented technology to extend Anodyne Medical Device's foam mattress product line and to significantly expand our patient-positioning devices," says Mark Bidner, chairman and CEO of Anodyne Medical Device.
